Value of School Property. The school buildings, grounds, school-fur-

niture and apparatus belonging to the city of Lichmond is valued at \$235,000.

Expenses.

The secretary of the City School Board disburses monthly \$6,400, this being the payroll of principals, teachers, and janitors for the scholastic year 1874-'75. The entire expenditures for the support of the public schools for the fiscal year ending August 1, 1875, is estimated at \$66,500. The average cost for tuition and all other expenses for the school-term of 1874-'75 is estimated not to exceed \$16 per scholar.

Increase of Scholars, and more School Accommodations Required.

There is up to this time an increase of 315 scholars attending the public schools over the number of the preceding school-term. The school authorities have been unable to admit about 200 other applicants for the want of accommodations in the respective localities. The superintendent of schools and the supervisors of school property, appreciating the trouble, have recommended to the School Board for the next scholastic year the construction of a school-house, to accommomodate about 400 white scholars, in Clay Ward north of Broad street; also, additions to the Madison and Bellevue schools, and additions to the Baker school (colored), in order that the Navy-Hill school may be vacated, which is totally unfitted for school pur-poses. The School Board have these matters under consideration, and at a proper time, no doubt, will apply to the City Council for a sufficient appropriation to carry out we feel assured, will respond cheerfully to any reasonable request of the City School Board, a liberal provision for sustaining and improving the public-school system of our city being of vital importance. The public schools in the city of Rich-

mond have become one of its permanent institutions, and its citizens will cheerfully support them at any reasonable cost.

The citizens of Richmond have cause for congratulation in the rapid growth and eminent success of our public schools. The organization has become more nearly perfect each year; beginning with the primary schools, advancing to the grammar schools, it has culminated in the high-school. A scholar passing through the schools will be fully prepared for business pursuits, or should be desire to continue his education he can enter any of our colleges. The school officers and Board have spared no efforts to make the schools second to none, and their past success warrants us in cordially commending them to public confidence and sup-
